

Register with Valid Credential

Priority	Severity	Behavior	Type
High	Critical	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

Ensure the user can register an account with complete and valid data, and is redirected to the next page upon successful registration.

Preconditions

- The user does not have an account.
- The browser opens and is redirected to the Register page.

Postconditions

A new account has been successfully created and saved in the system.

Steps to reproduce

#	Step	Action	Expected Result
1	Go to the Register page		The register page is displayed
2	Fill name	najminaak	The username field is filled
3	Fill in the email	najminakinanti2@gmail.com	Email received, valid format
4	Fill in the password	password	Password accepted, meets the minimum rule (8 characters)
5	Fill in the password confirmation	password	Confirmation match no error message
6	Fill in age data	17	Value accepted, valid
7	Fill in height	168	Value accepted, valid
8	Fill weight	46	Value accepted, valid
9	Select Gender	other	Selected options as per choice
10	Select Goals	maintain weight	Selected options as per choice
11	Select Activity Level	very active	Selected options as per choice
12	Click Register Button		Account successfully created and redirected to dashboard

Register with a password of less than 8 characters

Priority	Severity	Behavior	Type
Medium	Major	Negative	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

Ensure the system rejects registration if the password is less than 8 characters and displays a validation message.

Preconditions

- The user does not have an account.
- The browser opens and is redirected to the Register page.

Postconditions

- No account is created in the system.
- All fields remain filled except for the password and confirm password fields, which are automatically cleared.

Steps to reproduce

#	Step	Action	Expected Result
1	Go to the Register page		The register page is displayed
2	Fill name	najminaak	User name field populated
3	Fill email	najminakinanti2@gmail.com	Email received, valid format
4	Fill password	pass	Password accepted in input, but not yet validated
5	Fill password confirmation	pass	The confirmation field is filled in and matches the password
6	Fill age	17	Value accepted, valid
7	Fill height	168	Value accepted, valid
8	Fill weight	46	Value accepted, valid
9	Select gender	other	Value accepted, valid
10	Select goals	maintain weight	Selected option as per choice
11	Pilih level aktivitas	very active	Selected option as per choice
12	Click register buttoo		• Validation appears: "Password must be at least 8 characters" • Account not created • Stay on the Register page

TESTCALORY-14 / Autentikasi

Logout

Priority	Severity	Behavior	Type
High	Major	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	Yes	Manual
Status	Milestone		
Actual	-		

Description

Ensure that the user can successfully log out through the dropdown menu and is redirected to the login page (or landing page).

Preconditions

User is logged in

Postconditions

User session is terminated and user is redirected to login/landing page

Steps to reproduce

#	Step	Action	Expected Result
1	Click the dropdown menu on the header/user avatar		User dropdown menu opens
2	Select the Logout option		The user out, ends the session, and redirects to the login or landing page.

TESTCALORY-15 / Autentikasi

Login with Valid Credential

Priority	Severity	Behavior	Type
High	Normal	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

Verify that the user can successfully log in using a valid email and password.

Preconditions

- The user is already registered in the system.
- The user knows a valid email and password.

Postconditions

The user is successfully logged in and redirected to the main dashboard or homepage.

Steps to reproduce

#	Step	Action	Expected Result
1	Open the application login page		Login page is displayed
2	Enter a valid email in the email field	demo@example.com	The email is shown in the input field
3	Enter a valid password in the password field	password123	The password is masked and shown in the input field
4	Click the Login button		The user is redirected to the main page/dashboard
5	Verify the user’s name or a logged-in indicator appears		Login is successful, and user-specific content is displayed

TESTCALORY-16 / Autentikasi

Login with Invalid Password

Priority	Severity	Behavior	Type
Medium	Normal	Negative	Functional
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Manual
Status	Milestone		
Actual	-		

Description

Verify that the user cannot log in using a valid email and an incorrect password, and that the appropriate error message is displayed.

Preconditions

- The user is already registered in the system.
- The user knows a valid email but uses an incorrect password.

Postconditions

- The user is not logged in.
- An appropriate error message is shown.

Steps to reproduce

#	Step	Action	Expected Result
1	Open the application login page		Login page is displayed
2	Enter a valid email in the email field	user@example.com	The email is shown in the input field
3	Enter an invalid password in the password field	password	The password is masked and shown in the input field
4	Click the Login button		The system shows an error message (e.g., "Incorrect password" or "Login failed")
5	Verify that the user remains on the login page		The login attempt fails and user is not redirected

TESTCALORY-5 / Food Entries

Add Food Entry - Positive

Priority	Severity	Behavior	Type
Medium	Normal	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

This test case verifies that the process of adding food entries runs successfully when all data is filled in correctly.

Preconditions

- User has logged in
- User is on the Food Entries page

Postconditions

The success message is displayed and the added food data successfully appears in the food list.

Steps to reproduce

#	Step	Action	Expected Result
1	User clicks the Add Food Entry button		Form appears with all inputs available
2	User enters food name	Apple	Successful input
3	User enters calories per serving	95	Successful input
4	User enters serving amount	1	Successful input
5	User enters serving unit	piece	Successful input
6	User submits the food entry form		User should see success message

TESTCALORY-6 / Food Entries

Failed Add Food Entry- Negative

Priority	Severity	Behavior	Type
Medium	Minor	Not set	Other
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

The warning appears because the user left the Food Name field blank, so the food data is not added to the list.

Preconditions

- User has logged in
- User is on the Food Entries page

Postconditions

User should see validation error

Steps to reproduce

#	Step	Action	Expected Result
1	User clicks the Add Food Entry button		Form appears with all inputs available
2	User enters food name		Empty field
3	User enters calories per serving	95	Successful input
4	User enters serving amount	1	Successful input
5	User enters serving unit	piece	Successful input
6	User submits the food entry form		User should see validation error

TESTCALORY-12 / Custom Foods

Add Custom Foods - Positive

Priority	Severity	Behavior	Type
Medium	Normal	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

This test case verifies that the process of adding custom food runs successfully when all data is filled in correctly.

Preconditions

- User has logged in
- User is on the custom food page

Postconditions

The success message is displayed and the added custom food data successfully appears in the food list.

Steps to reproduce

#	Step	Action	Expected Result
1	User clicks the Add Custom Food button		Form appears with all inputs available
2	User enters custom food name	Tahu goreng	Successful input
3	User enters custom food calories	120	Successful input
4	User enters custom food serving unit	piece	Successful input
5	User selects custom food category	Vegetables	Successful input
6	User enters custom food notes	Fried using corn oil	Successful input
7	User submits the custom food form		User should see success message

TESTCALORY-13 / Custom Foods

Failed Add Custom Foods - Negative

Priority	Severity	Behavior	Type
Medium	Normal	Negative	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

The warning appears because the user left the Food Name field blank, so the custom food data is not added to the list.

Preconditions

- User has logged in
- User is on the custom food page

Postconditions

User should see custom food validation error

Steps to reproduce

#	Step	Action	Expected Result
1	User clicks the Add Custom Food button		Form appears with all inputs available
2	User enters custom food name		Empty field
3	User enters custom food calories	120	Successful input
4	User enters custom food serving unit	piece	Successful input
5	User selects custom food category	Vegetables	Successful input
6	User enters custom food notes	Fried using corn oil	Successful input
7	User submits the custom food form		User should see custom food validation error

TESTCALORY-3 / Profile Page

Open the profile page from the user dropdown

Priority	Severity	Behavior	Type
Medium	Normal	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

Ensure that the user can open the profile page through the dropdown and see the "Body Mass Index (BMI)" element.

Preconditions

- The user is already logged in.
- The main page is open.

Postconditions

- The user is on the profile page.
- The text "Body Mass Index (BMI)" appears.

Steps to reproduce

#	Step	Action	Expected Result
1	Click the dropdown menu on the header/user avatar		The user dropdown menu opens
2	Select the "Profile" option		The user is redirected to the profile page
3	Verify the text "Body Mass Index (BMI)"		The text "Body Mass Index (BMI)" is displayed on the profile page

Update the user's profile data with valid information

Priority	Severity	Behavior	Type
High	Major	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

Ensure that the user can update all profile data and save it successfully.

Preconditions

- The user is on the profile page
- The profile form is visible

Postconditions

The data has been successfully updated

Steps to reproduce

#	Step	Action	Expected Result
1	Change the content of the Name field	Anti Edit	The name field is filled in
2	Change the content of the Age field	18	The field accepts valid numbers
3	Change the content of the Gender field	Female	The selected option matches the choice
4	Change the content of the Height field	165	The value is accepted and valid
5	Change the content of the Weight field	47	The value is accepted and valid
6	Change the content of the Fitness Goal field	Weight Loss	The selected option matches the choice
7	Change the content of the Activity Level field	Moderate	The selected option matches the choice
8	Click the "SAVE" button		Success, the data is saved

Update the user's profile data with a Height value below the minimum limit

Priority	Severity	Behavior	Type
High	Major	Negative	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Manual
Status	Milestone		
Actual	-		

Description

Ensure that the system rejects the profile update if the height value is below or above the valid range (50 cm–250 cm), and displays an error message.

Preconditions

- The user is on the profile page
- The profile form is visible

Postconditions

- The data is not saved
- An error message appears

Steps to reproduce

#	Step	Action	Expected Result
1	Change the content of the Name field	Anti Edit 2	The username field is filled in.
2	Change the content of the Age field	19	Kolom menerima angka valid
3	Change the content of the Gender field	Male	The selected option matches the choice
4	Change the contents of the Height field	165	The value is accepted and valid
5	Update the Weight column values	44	The value is accepted and valid
6	Update the Fitness Goal column values	Weight Gain	The selected option matches the user's choice
7	Update the Activity Level column values	Light	The selected option matches the user's choice
8	Click the 'SAVE' button		• The form was not saved. • A message appeared: 'Height must be a number between 50 and 250 cm'

Update the password with valid information

Priority	Severity	Behavior	Type
High	Major	Positive	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Automated
Status	Milestone		
Actual	-		

Description

Ensure that the user can change their password if all inputs are valid: the current password is correct, the new password meets the requirements, and the confirmation matches.

Preconditions

- The user is logged in and is on the Profile page
- The user's current password is known

Postconditions

Password has been successfully updated

Steps to reproduce

#	Step	Action	Expected Result
1	Fill in Current Password	password	Input received and masked
2	Fill in New Password	passwordbaru	Input accepted, meets the minimum requirement (8 characters)
3	Fill in Confirm Password	passwordbaru	Input accepted, confirmation matches, no error message displayed
4	Click the SAVE button		Password has been successfully changed

Update password using a new password with fewer than 8 characters

Priority	Severity	Behavior	Type
Medium	Major	Negative	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Automated
Status	Milestone		
Actual	-		

Description

Ensure that the system rejects the password change if the new password is less than 8 characters long.

Preconditions

The user is logged in and on the Profile page

Postconditions

- The password was not changed
- A validation message appeared

Steps to reproduce

#	Step	Action	Expected Result
1	Fill on Current Password	password	Input is accepted and masked
2	Fill in New Password	pass	Too short
3	Fill in Confirm Password	pass	Matches the new password
4	Click the SAVE button		• MuA message appears: 'The password field must be at least 8 characters.' • The password was not changed

TESTCALORY-10 / Profile Page

Update password using an incorrect old password

Priority	Severity	Behavior	Type
High	Major	Negative	Functional
Layer	Is Flaky	Is Muted	Automation
E2E	No	No	Automated
Status	Milestone		
Actual	-		

Description

Ensure that the system rejects the password change if the current password is incorrect.

Preconditions

The user is logged in and on the Profile page

Postconditions

- The password was not changed
- A validation message appeared

Steps to reproduce

#	Step	Action	Expected Result
1	Fill in Current Password	passwordsalah	Input accepted
2	Fill in New Password	passwordbaru	Input accepted, meets the minimum requirement (8 characters)
3	Fill in Confirm Password	passwordbaru	Input accepted, confirmation matches, and no error message is shown
4	Click the SAVE button		- A message appears: 'The password is incorrect.' - The password was not changed

TESTCALORY-18 / USDA Search

Successfully search for food in USDA database and display results

Priority	Severity	Behavior	Type
Not set	Normal	Positive	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan sistem menampilkan hasil pencarian USDA dengan benar saat pengguna mencari makanan valid seperti "apple".

Preconditions

- Pengguna sudah login
- Berada di halaman USDA Search

Postconditions

- Hasil pencarian ditampilkan
- Informasi nutrisi terlihat untuk setiap makanan

Steps to reproduce

#	Step	Action	Expected Result
1	Masuk ke halaman USDA Search		
2	Isi kata kunci "apple" di kotak pencarian	apple	
3	Klik tombol Search		
4	Verifikasi hasil pencarian menampilkan beberapa makanan terkait "apple"		
5	Pastikan setiap item menampilkan:		Nama makanan

#	Step	Action	Expected Result
	- Informasi brand - Kalori per porsi - Pilihan ukuran porsi		
6	Pastikan terlihat variasi seperti "APPLE", "Apple, candied", "Apple, raw"		terdapat data "APPLE", "Apple, candied", "Apple, raw"
7	Verifikasi informasi nutrisi setiap item akurat		

TESTCALORY-19 / USDA Search

Add USDA food to food entries

Priority	Severity	Behavior	Type
Not set	Normal	Positive	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan pengguna dapat menambahkan makanan dari hasil pencarian USDA ke food log mereka.

Preconditions

- Pengguna sudah login
- Sudah melakukan pencarian "chicken breast"

Postconditions

Makanan ditambahkan ke food entries dengan source **usda**

Steps to reproduce

#	Step	Action	Expected Result
1	Cari makanan "chicken breast"		
2	Pilih salah satu item dari hasil pencarian		
3	Isi jumlah porsi (contoh: 150 gram)		
4	Klik tombol "Add to Food Log"		
5	Verifikasi pengguna diarahkan ke halaman Food Entries		
6	Verifikasi pesan sukses muncul		

TESTCALORY-20 / USDA Search

Search USDA with empty query

Priority	Severity	Behavior	Type
Not set	Normal	Negative	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan sistem menolak pencarian kosong pada form USDA

Preconditions

- Pengguna sudah login
- Berada di halaman USDA Search

Postconditions

- Form tidak dikirim
- Pesan validasi muncul

Steps to reproduce

#	Step	Action	Expected Result
1	Masuk ke halaman USDA Search		
2	Biarkan kolom pencarian kosong		
3	Klik tombol Search		
4	erifikasi muncul pesan validasi "Please fill out this field."		

TESTCALORY-21 / USDA Search

Search USDA with query too short

Priority	Severity	Behavior	Type
Not set	Normal	Negative	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan sistem menolak pencarian dengan query yang terlalu pendek

Preconditions

- Pengguna sudah login
- Berada di halaman USDA Search

Postconditions

- Form tidak dikirim
- Muncul pesan validasi

Steps to reproduce

#	Step	Action	Expected Result
1	Masuk ke halaman USDA Search		
2	Isi query dengan satu huruf, misalnya "a"	a	
3	Klik tombol Search		
4	Verifikasi muncul pesan validasi "The query field must be at least 2 characters"		

TESTCALORY-22 / USDA Search

Add USDA food with invalid serving amount

Priority	Severity	Behavior	Type
Not set	Normal	Negative	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan sistem menolak input jumlah porsi negatif saat menambahkan makanan USDA

Preconditions

- Pengguna sudah login
- Sudah mencari "chicken breast"

Postconditions

- Data tidak ditambahkan
- Muncul pesan validasi

Steps to reproduce

#	Step	Action	Expected Result
1	Pilih item hasil pencarian "chicken breast"		
2	Isi jumlah porsi dengan -5		

#	Step	Action	Expected Result
3	Klik tombol "Add to Food Log"		
4	Verifikasi muncul pesan "Serving amount must be positive number"		

TESTCALORY-23 / USDA Search

Add USDA food with zero serving amount

Priority	Severity	Behavior	Type
Not set	Normal	Negative	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan sistem menolak input porsi 0 saat menambahkan makanan USDA

Preconditions

- Pengguna sudah login
- Sudah mencari "chicken breast"

Postconditions

- Data tidak ditambahkan
- Muncul pesan validasi

Steps to reproduce

#	Step	Action	Expected Result
1	Pilih item hasil pencarian "chicken breast"		
2	Isi jumlah porsi dengan 0		
3	Klik tombol "Add to Food Log"		
4	1. Verifikasi muncul pesan "Serving amount must be positive number"		

Add USDA food with empty serving amount

Priority	Severity	Behavior	Type
Not set	Normal	Negative	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan sistem menolak ketika kolom porsi dibiarkan kosong

Preconditions

- Pengguna sudah login
- Sudah mencari "chicken breast"

Postconditions

- Data tidak ditambahkan
- Muncul pesan validasi

Steps to reproduce

#	Step	Action	Expected Result
1	Pilih item hasil pencarian "chicken breast"		
2	Kosongkan kolom jumlah porsi		
3	Klik tombol "Add to Food Log"		
4	1. Verifikasi muncul pesan "Serving amount is required"		

Get food recommendations from AI chatbot

Priority	Severity	Behavior	Type
Low	Normal	Positive	Other
Layer	Is Flaky	Is Muted	Automation
Not set	No	No	Automated
Status	Milestone		
Actual	-		

Description

Memastikan AI chatbot memberikan rekomendasi makanan yang dipersonalisasi berdasarkan profil pengguna.

Preconditions

- Pengguna sudah login
- Berada di halaman Chatbot

Postconditions

- Rekomendasi makanan ditampilkan
- Setiap makanan memiliki informasi kalori

Steps to reproduce

#	Step	Action	Expected Result
1	Akses halaman Chatbot		
2	Ketik "What are some healthy breakfast options for weight loss?"		
3	Klik tombol "Send"		
4	Verifikasi AI memberikan respons rekomendasi makanan		
5	Verifikasi setiap rekomendasi memiliki informasi kalori		
6	Verifikasi bahwa rekomendasi relevan dengan profil pengguna		

TESTCALORY-26 / AI Chatbot

Clear chat history

Priority	Severity	Behavior	Type
